※その他のテイクティ製品も 60% のサービス価格で販売します。

TAKET Audition and Sale

TAKET ; Producing company of TAKET-H2+ in Japan. H2+ is using only TAT-driver. TAT-driver is constructed by high polymer piezo electric film for vibration board. It drive like Heil-driver even if it has no magnet.

There is a review in Head-Fi. "The Worlds Best Headphone?" Annotation; Heil-driver; The sound is generated by the expansion and the shrinkage of plastic film formed like wave by the power of the magnet arranged in surroundings.

Trafomatic Audio ; They are extremely evaluated as their beautiful design and technology of tube amplifier. You can see many beautiful photos of amplifier in their web site. And also they designed the tube amplifier for exclusive use TAKET-H2+. It's name is T2+. And they are selling it.

T4+ ; The name of collaboration of TAKET-H2+ headphone and Trafomatic Audio T2+ amplifier. We were reviewed by 6moons with some regret about bass range. So TAKET revised H2+. We released it as Ver.3 of H2+. It comes with a deep and thick bass and with beautiful treble. As a result, it finished in the sound-stage where overwhelmed reality have existed.

Other our exhibition

TAKET recommend that you put a super-tweeter on the outside of the headphone enclosure so that you can feel the starting element of sound through the skin of your face. We developed exchange cable of two models including external super-tweeter for headphone and earphone.

1. Headphone exchange cable for AKG.
2. Earphone exchange cable for SHURE.

Fixed price are JPY 16,000 both

Festival discount: exchange cables JPY 9,000

You can purchase other TAKET products by about 60% of fixed price.
